## I - Introduction

Trouver des documentations aéronautiques de qualité sur Internet, qu'il s'agisse de plans 3 vues, de manuels de vol voire de manuels de maintenance, relève parfois de la gageure.

Fort de ce constat, j'ai entrepris de collecter un maximum de documents et de les tenir à disposition de chacun gratuitement, sur simple demande. Faire un site de web serait trop compliqué et trop lourd (plus de 200Go de données...).

Si de votre côté, vous avez des documents intéressants, je suis bien sûr preneur :

- Photos d'ensemble et de détails
- Manuels de vol et de maintenance
- Liasses de plans
- Plans 3 vues
- etc...

Je tiens à remercier tous les contributeurs qui m'aident chaque jour à enrichir cette liste déjà bien fournie. Un grand merci à Alain, Joaquim, Eugenio et Christian ainsi qu'à l'équipe d'[XPFR.org](http://XPFR.org) ;-)

Attention, ces documents sont mis à disposition pour un usage personnel, idéalement en modélisme et simulation de vol. Je ne peux pas garantir leur exactitude ni leur provenance.

**Ils ne conviennent en aucun cas à un usage réel.**

\*\*\*\*\*

Find quality aeronautical documentation on the Internet like blue prints, flight manuals or maintenance manuals is usually a challenge.

That's why I began to collect a maximum of documents and keep them available to everyone, freely, upon request. Making a web site would be too complicated and too heavy (more than 200GB of data ...).

If, by your side, you have interesting documents, I am clearly interested:

- Photos (general and details)
- Flight manuals and maintenance manuals
- Sets of plans
- 3 views drawings etc. ...

I want to thank all contributors who helped me everyday to enrich this already huge list. A big special thanks to Alain, Joaquim, Eugenio and Christian as well as the XPFR.org team ;-)

Warning: these documents are available for personal use only (like RC modeling and flight simulator use). I can't vouch for their accuracy or origin.

**They mustn't be used for any real aeronautical use.**
